

CWP Europe Empowers Albanian Renewable Energy Sector with Investment in Wind Resource Assessment Center

12 June 2023

FOR IMMEDIATE RELEASE

CWP Europe has announced a partnership with the Polytechnic University of Tirana (PUT) to establish a Wind Resource Assessment Center. This move marks the first of its kind in the region and demonstrates the company's ongoing commitment to revolutionizing the energy landscape in Southeast Europe and developing the wind industry in Albania.

Aimed at fostering the development of practical skills, the center is endowed with cutting-edge hardware, state-of-the-art analysis software, and invaluable hands-on training for PUT faculty members and students.

The launch event was attended by Mr Enio Jaco, President of AmCham in Albania, representatives from the US Embassy, prominent Albanian renewable energy experts, and CWP Europe representatives, namely Pellumb Kallaba, Country Manager for Albania, Ivan Lozanov, Senior Development Manager, and Mark Crandall, Co-Founder and Chairman.

Experts from the CWP Resource Assessment teams will commence the first round of training towards the end of June. The ongoing partnership will include site visits to CWP project sites, where resource measurement equipment will be installed and operated.

About CWP Europe

CWP Europe is a leading company for the development of renewable energy projects in Southeast Europe. Over the past 15 years, CWP has invested in sustainable development and energy transition in the region and has already successfully realized some of the largest wind farms in the region. It is currently developing over 6 GW of renewable energy capacity in Serbia, Bulgaria, Romania, Montenegro, Albania, Bosnia and Herzegovina, Slovenia, Croatia, Moldova, North Macedonia and Ukraine. CWP's projects aim to deliver long-term positive impact for the communities around them, and the company always partners with the local stakeholders to ensure this objective. This new partnership with the Polytechnic University of Tirana and the establishment of the Wind Resource Assessment Center is another testament to CWP's commitment to supporting local communities and investing in education.
